In Microsoft Access 2010, you can build web databases and publish them to a SharePoint site. SharePoint visitors can use your database application in a web browser, using SharePoint permissions to determine who can see what.

What's new in Microsoft Access 2010 - Access

A user guide or also commonly known as is a technical communication document intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies.

SharePoint Permissions Overview. Users within SharePoint are granted permissions to objects such as Sites, Lists, Folders and List Items. The permission that the user receives can be granted in many ways such as directly against the user account, against a SharePoint Group that the user happens to be a member of, or by Active Directory Group.
