The Authority Online site is used for claims management, online applications, data management, and reporting. The DMS Online site is for the new single family homeownership reservation system starting 8/31/2017.

Programs

Access 2007 introduced major new functionality in both the engine and the interface. Seasoned developers discovered new things are possible, and casual users found more things within their grasp.

Microsoft Access tips: Converting to Access 2007

HTTP headers allow the client and the server to pass additional information with the request or the response. An HTTP header consists of its case-insensitive name followed by a colon ':', then by its value (without line breaks). Leading white space before the value is ignored.

This controller lets you send an FTP "retrieve file" or "upload file" request to an FTP server. If you are going to send multiple requests to the same FTP server, consider using a FTP Request Defaults Configuration Element so you do not have to enter the same information for each FTP Request Generative Controller.
